SECTION 5: Firefighting measur	res
5.1 Extinguishing media	
Suitable extinguishing agents:	CO2, powder or water spray. Fight larger fires with water spray or alcoresistant foam.
For safety reasons unsuitable	
extinguishing agents:	Water with full jet
5.2 Special hazards arising from	
the substance or mixture	Formation of toxic gases is possible during heating or in case of fire. In case of fire, the following can be released: Carbon monoxide (CO)
5.2. Advice for firefighters	Under certain fire conditions, traces of other toxic gases cannot be excluded.
5.3 Advice for firefighters Protective equipment:	Wear self-contained respiratory protective device.
<u>riotective equipment.</u>	Do not inhale explosion gases or combustion gases.
	Wear fully protective suit.
Additional information	Dispose of fire debris and contaminated fire fighting water in accordance w
	official regulations.
	Collect contaminated fire fighting water separately. It must not enter the sewa system.
	system.
SECTION 6: Accidental release r	system.
SECTION 6: Accidental release r 6.1 Personal precautions,	system.
	system.
6.1 Personal precautions,	system.  measures Ensure adequate ventilation
6.1 Personal precautions, protective equipment and	system. measures Ensure adequate ventilation Keep away from ignition sources.
6.1 Personal precautions, protective equipment and	system. measures Ensure adequate ventilation Keep away from ignition sources. Use respiratory protective device against the effects of fumes/dust/aerosol.
6.1 Personal precautions, protective equipment and emergency procedures	system. measures Ensure adequate ventilation Keep away from ignition sources. Use respiratory protective device against the effects of fumes/dust/aerosol. Wear protective equipment. Keep unprotected persons away.

Absorb with liquid-binding material (sand, diatomite, acid binders, univer binders, sawdust). Dispose contaminated material as waste according to section 13. Ensure adequate ventilation.

### **SECTION 7: Handling and storage**

• 7.1 Precautions for safe	
handling	Keep receptacles tightly sealed.
	Store in cool, dry place in tightly closed receptacles.
	Keep away from heat and direct sunlight.
	Ensure good interior ventilation, especially at floor level. (Fumes are heavier than air).
	Use only in well ventilated areas.
	Ensure good ventilation/exhaustion at the workplace.
<ul> <li>Information about fire - and</li> </ul>	
explosion protection:	Keep ignition sources away - Do not smoke.

### (Contd. of page 3) Protect against electrostatic charges. 7.2 Conditions for safe storage, including any incompatibilities · Storage: · Requirements to be met by storerooms and receptacles: Store only in the original receptacle. Prevent any seepage into the ground. · Information about storage in one common storage facility: Store away from oxidising agents. Store away from foodstuffs. · Further information about storage conditions: Store receptacle in a well ventilated area. Store in a cool place. Keep container tightly sealed. · Storage class: 3 · 7.3 Specific end use(s) No further relevant information available. **SECTION 8: Exposure controls/personal protection** 8.1 Control parameters Ingredients with limit values that require monitoring at the workplace: The product does not contain any relevant quantities of materials with critical values that have to be monitored at the workplace. · Additional information: The lists valid during the making were used as basis. · 8.2 Exposure controls · Appropriate engineering controls No further data; see section 7. · Individual protection measures, such as personal protective equipment General protective and hygienic measures: Do not eat, drink, smoke or sniff while working. Apply solvent resistant skin cream before starting work. Use skin protection cream for skin protection. Keep away from foodstuffs, beverages and feed. Immediately remove all soiled and contaminated clothing Wash hands before breaks and at the end of work. Do not inhale gases / fumes / aerosols. · Respiratory protection: Filter AX In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use self-contained respiratory protective device. · Hand protection Preventive skin protection by use of skin-protecting agents is recommended. After use of gloves apply skin-cleaning agents and skin cosmetics. Skin protection agent recommendation for preventive skin shelter without use of protective gloves: STOKODERM (http://www.stoko.com) Skin protection agent recommendation for preventive skin shelter in application and combination of protective gloves: STOKO EMULSION (http://www.stoko.com) Skin protection recommendation for skin cleaning after product handling: FRAPANTOL (http://www.stoko.com) Skin protection agent recommendation for skin aftercare: STOKO VITAN (http://www.stoko.com) The protection gloves to be used have to comply with the specifications of the directive 89/686/EC and the directive derived decree EN374, respectively, e.g. the above listed protection glove type. The mentioned permeation times' data were generated and verified with material samples of the recommended protection glove type in the scope of laboratory anylyses of the company KCL GmbH in compliance with EN374.
