

2.5 Dimpled Metal Lath Specification

A self-furring expanded dimpled metal lath ideal for interior and exterior use over sheathing, masonry and other solid surfaces. The dimple self-furring plaster base is manufactured with evenly spaced indentations that hold the metal lath ¼" away from the surface to be plastered.

DIMPLED (dimple spacing 5-1/4" on length with offset rows 5-1/4" apart on width)

Item	Specification	Tolerance
Material	Hot Dipped Galvanized Coils	
Thickness	1/8" (3.2mm)	+/- 1/64" (0.40mm)
Width	27" (686 mm)	+/- 3/8" (9.5mm)
Length	96" (2438mm)	-0" +1" (25.4 mm)
Weight	2.5 lbs / square yard (1.4kg/m ²)	+/-10%
Total Weight	4.98 lbs	+/-10%

Packing: 10 sheets/bundle, 250 sheets/steel pallet.

Label: One tag on each pallet; Or an UPC label on each sheet.
